**In the Specification:**

Please amend page 5, line 22 to page 6, line 1 as follows by adding the underlined text:

Figure 2 is the exploded view showing the components of the slider assembly and the pop-up and roll-back assembly. As shown, lever 1 is pulled out for un-latching. The push rod 2 links the slider 3 and the lever 1. The slider is made of aluminum material to render sturdier support. The slider spring 4 is used to prevent the lever 1 fall back in un-latch stage. Parts 1 to 4 are fixed on the lid mount 5. Parts 1 to 5 make up the slider assembly. The other parts are for the pop-up and roll-back action. Brew head base 6 is the base which links the whole assembly. Lift platform 10 is the part that links the slider assembly to the brew head base 16. The hinge pin 12 is to fix the hinge spring 13 and the slider assembly to the lift platform. The lift platform 10 is also made of aluminum to provide stronger support. The lift platform spring 11 is placed on the two legs of the lift platform 10 to make the pop-up action. The hinge spring 13 is used for the roll-back action.

Please amend page 7, lines 29-32 as follows by adding the underlined text:

In an embodiment, the slider comprises at least three legs 18.

In another embodiment, the counter side holes 17 for locking are on the brew head base.
